

# YOU CAN DO IT

WITHOUT FINGERSTICKS\*

FreeStyle  
**Libre 2**  
FLASH GLUCOSE MONITORING SYSTEM

## The FreeStyle Libre 2 system is now available via VHSS

WE ARE PROUD TO SERVE OUR VETERANS AND ACTIVE DUTY BENEFICIARIES WITH DIABETES

### The FreeStyle Libre 2 sensor

- Painless<sup>†1</sup> sensor application
- Easiest iCGM to apply<sup>†2</sup> with no in-person patient training required
- Easy to see glucose trends and patterns help make insulin dosing decisions

### The FreeStyle Libre 2 reader

- Stores 90 days of glucose data
- Only iCGM with optional alarms<sup>§</sup> that measures glucose accurately every minute<sup>2,3</sup>
- Provides real-time glucose readings every minute with a simple scan<sup>2</sup>

| PRODUCT                  | ITEM #   | PACKAGE/UOM | PRICE   |
|--------------------------|----------|-------------|---------|
| FreeStyle Libre 2 Sensor | 71992-01 | 1 ct. box   | \$65.32 |
| FreeStyle Libre 2 Reader | 71951-01 | 1 ct. box   | \$84.00 |

VHSS IS A VERIFIED SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS (SDVOSB) AND DISTRIBUTOR OF THE FREESTYLE LIBRE 2 SYSTEM

\*Fingersticks are required if your glucose alarms and readings do not match symptoms or when you see Check Blood Glucose symbol during the first 12 hours. †Data from this study was collected with the outside US version of the FreeStyle Libre 14 day system. FreeStyle Libre 2 has the same features as FreeStyle Libre 14 day system with optional real-time glucose alarms. Therefore the study data is applicable to both products. ‡Based on a comparison to Dexcom G6. §Data based on the number of patients assigned to each manufacturer based on last filled prescription in US Retail Pharmacy and DME.

### Indications and Important Safety Information

**FreeStyle Libre 2 system:** The FreeStyle Libre 2 Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device with real time alarms capability indicated for the management of diabetes in persons age 4 and older. **\* WARNINGS/LIMITATIONS\*:** The System must not be used with automated insulin dosing (AID) systems, including closed loop and insulin suspend systems. Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. Do not take high doses of vitamin C (more than 500 mg per day), as this may falsely raise your Sensor readings. Failure to use the System according to the instructions for use may result in missing a severe low blood glucose or high blood glucose event and/or making a treatment decision that may result in injury. If glucose alarms and readings from the System do not match symptoms or expectations, use a fingerstick blood glucose value to make diabetes treatment decisions. Seek medical attention when appropriate and contact Abbott toll-free 855-632-8658 or visit [www.FreeStyleLibre.us](http://www.FreeStyleLibre.us) for detailed indications for use and safety information.

\*Please refer to [www.FreeStyleLibre.us](http://www.FreeStyleLibre.us) for the indications and important safety information.

**FreeStyle Libre 14 day system:** FreeStyle Libre 14 day Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device indicated for the management of diabetes in persons age 18 and older. It is designed to replace blood glucose testing for diabetes treatment decisions. The System detects trends and tracks patterns aiding in the detection of episodes of hyperglycemia and hypoglycemia, facilitating both acute and long-term therapy adjustments. Interpretation of the System readings should be based on the glucose trends and several sequential readings over time. The System is intended for single patient use and requires a prescription. **CONTRAINDICATIONS:** Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. **WARNINGS/LIMITATIONS:** Do not ignore symptoms that may be due to low or high blood glucose, hypoglycemic unawareness, or dehydration. Check sensor glucose readings with a blood glucose meter when Check Blood Glucose symbol appears, when symptoms do not match system readings, or when readings are suspected to be inaccurate. The FreeStyle Libre 14 day system does not have alarms unless the sensor is scanned, and the system contains small parts that may be dangerous if swallowed. The FreeStyle Libre 14 day system is not approved for pregnant women, persons on dialysis, or critically-ill population. Sensor placement is not approved for sites other than the back of the arm and standard precautions for transmission of blood borne pathogens should be taken. The built-in blood glucose meter is not for use on dehydrated, hypotensive, in shock, hyperglycemic-hyperosmolar state, with or without ketosis, neonates, critically-ill patients, or for diagnosis or screening of diabetes. When using FreeStyle LibreLink app, access to a blood glucose monitoring system is required as the app does not provide one. Review all product information before use or contact Abbott toll-free 855-632-8658 or visit [www.FreeStyleLibre.us](http://www.FreeStyleLibre.us) for detailed indications for use and safety information. For full indications for use and safety information, visit <https://www.FreeStyleLibre.us/safety-information>.

**FreeStyle Libre Pro system:** The FreeStyle Libre Pro Flash Glucose Monitoring System is a professional continuous glucose monitoring (CGM) device indicated for detecting trends and tracking patterns and glucose level excursions above or below the desired range, facilitating therapy adjustments in persons (age 18 and older) with diabetes. The system is intended for use by health care professionals and requires a prescription. **IMPORTANT:** The device may inaccurately indicate hypoglycemia. The results of the clinical study conducted for this device showed that 40% of the time when the device indicated that user sensor glucose values were at or below 60 mg/dL, user glucose values were actually in the range of 81-160 mg/dL. Therefore, interpretation of the FreeStyle Libre Pro Flash Glucose Monitoring System readings should only be based on the trends and patterns analyzed through time using the reports available per the intended use. **CONTRAINDICATIONS:** Remove the Sensor before MRI, CT scan, X-ray, or diathermy treatment. **WARNINGS/LIMITATIONS:** The FreeStyle Libre Pro System does not provide real-time results and patients should adhere to their blood glucose monitoring routine while using the system. If a sensor breaks, contact physician and call Customer Service. Patients with high levels of ascorbic acid (Vitamin C) or salicylic acid (used in Aspirin) or severe dehydration or excessive water loss may experience inaccurate results with this system. The FreeStyle Libre Pro System is not approved for pregnant women, persons on dialysis, or recommended for critically ill population. Sensor placement is not approved for sites other than the back of the arm and standard precautions for transmission of blood borne pathogens should be taken. Review all product information before use or contact Abbott toll-free 855-632-5297 or visit [www.FreeStyleLibrePro.us](http://www.FreeStyleLibrePro.us) for detailed indications for use and safety information.
